CC01SET - Foam set for Fireteam Zero board game box

from **30,56 EUR**

Item no.: 379820
shipping weight: 0.30 kg
Manufacturer: Feldherr

Product Description

Miniatures and game material from the basic game safely and neatly stored in the original board game box. Sarge, Rat, Sonny and Two Penny - the names of four soldiers who no longer appear on the list of the First Ranger Battalion. They disappeared in 1942 on one of the unit's top secret missions, fighting supernatural enemies and the ultimate evil. You take on the role of one of the heavily armed heroes and make your way through monster-ridden landscapes, locations and caves on nightmarish missions. The tactical horror board game offers plenty of entertainment as well as a variety of miniatures and game material. To keep everything safe and tidy in the box, we have the matching foam set for the basic box. The set consists of:- 1 foam inlay for 22 miniatures and game material (CCMEFR065BO)- 1 foam inlay for 16 miniatures (CCMEFU050BO)- 1 foam inlay for 8 miniatures and game material (CCMEFV045BO)- 1 matching foam lid A 65 mm high foam inlay with 25 precisely fitting compartments provides optimum protection for your miniatures. Especially when the figures have been primed, painted and washed after hours of painstaking work, it is important to store them separately from each other. This prevents collisions and the rubbing or chipping of paint. The top row of the foam mat provides a soft shelter for the 5 hero and 2 specialist miniatures. Round compartments are reserved for the Bone Fetch figures and the Cupbearer, Harvester, Mother of Worms and 4 Consumed Baitbags have compartments specially designed for them. The dice can be distributed across 2 compartments and a compartment in the centre serves as a storage space for markers. On the second mat, 16 customised compartments house the 4 Skin Fetch and 4 Corrupted Human miniatures, as well as 8 Baitbags, thus reliably protecting claws, knives and other sensitive parts from damage. On the third foam mat, there are 4 compartments for large playing cards and 2 for the small focus and turn cards. They all have finger-wide cut-outs for easier removal and are of course also suitable for cards with sleeves. Finally, with 8 miniature-specific compartments for the Corrupted Animals, all the miniatures in the game are perfectly stowed away. A further compartment provides space for the game markers and the lucky coin. Thanks to the clearly organised storage of the game materials, you can keep an overview at all times, save time when setting up the game and no information marker, no matter how small, gets lost. A matching foam lid completes the all-round care of the Fireteam Zero game box. It holds the 8 sector pieces, the threat list, the rulebook, the mission manual and the CD. The lid of the board game box protrudes approx. 2 cm. This ensures that all miniatures are safely stored, the game material is neatly stowed away and the contents of your box are optimally protected, even on the bumpiest of journeys to the next game. The foam inlays have the following dimensions:- Inlay CCMEFR065BO: 315 mm x 305 mm x 65 mm total height (55 mm usable height + 10 mm foam base)- Inlay CCMEFU050BO: 315 mm x 305 mm x 50 mm total height (40 mm usable height + 10 mm foam base)- insert CCMEFV045BO: 315 mm x 305 mm x 45 mm total height (35 mm usable height + 10 mm foam base)- high-quality, fine-pored foam- chlorine-free and acid-free- Made in Germany
