from **107,27 EUR**

Item no.: 377312
 shipping weight: 0.90 kg
 Manufacturer: Feldherr

Product Description

You've fallen for the mansion craze and after the first edition, second edition and numerous expansions, you now have a whole load of game boxes piling up on your shelf. Now that you've started painting the figures, it's finally time to tidy up and reorganise? We're happy to help. In this large Feldherr storage box, filled with the matching foam inserts, you have enough space to keep all the monster and investigator figures from the "Mansions of Madness" board game series well protected. A total of eight foam inserts ensure that all the monster and investigator figures from the "Mansions of Madness" series - from the basic game of the first edition to the "Horrific Journey" expansion - are well stowed away. And because the madness certainly won't end any time soon, you still have enough space for upcoming releases. Of course, you can also use the compartments that remain free for sorting game material such as tokens, cards and dice. The compartments of the inlays are precisely tailored to the figures including the base. Your miniatures are thus clearly organised and sensitive parts are optimally protected against breakage. You don't need to worry about painted figures either. They are spared scratches, abrasion and chipping paint. The Feldherr full-size insert with 11 compartments has space for your large and medium-sized monster figures. Three compartments are designed for miniatures on a large base, such as the Shoggothe. In the 8 smaller compartments, you can safely store the figures on a medium-sized base (e.g. Chtonians and Sternengezücht). In the Feldherr insert with 26 compartments, you can store your small monster figures and the investigators. The 20 larger compartments are designed for the monster miniatures on a small base, such as the Mi-Gos or the dogs of Tindalos. You can sort the investigator figures into the 6 small compartments. Finally, the pack contains 2 inserts with 36 compartments each, which can be used for investigator figures, small monster figures without bases and game accessories. The pack is rounded off with the matching foam lid. This ensures that the figures in the top insert are also protected from above. The DSLB310 storage box is made of coated, double-walled cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects your collection from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport.

Technical details- high-quality, fine-pored foam - Made in Germany- chlorine-free and acid-free
