from **31,15 EUR**

Item no.: 379619
shipping weight: 0.20 kg
Manufacturer: Feldherr

Product Description

For neat and safe storage of miniatures and game material in the "Catan: Starfarer" board game box from Kosmos. Infinite expanses await you. You are a star traveller. Your task is to colonise new solar systems and secure humanity's place among the interstellar races. There are many dangers lurking in space and everyday life is not entirely risk-free. To prevent your miniatures from breaking during transport or the paint from chipping off your painted figures, we have taken care to protect your models. At the same time, we've made sure your box is organised. The plastic sorters supplied aren't enough to keep your box tidy? No problem, this Feldherr foam set will support you on your travels and is a useful addition to the supplied playing aids. It won't keep space pirates off your back, but you'll have all your game materials neatly organised and quickly on the table in no time at all. So nothing stands in the way of a quick game. Place the playing cards in the plastic card holder from the original set and place the friendship stands on top of the cards. Due to the pre-moulded inserts, the cards only fit without protective sleeves. Place the cannons, engines, cargo modules, half modules and the encounter cards in the expansion box. Each of the four foam inserts for the figures has enough compartments to store all 92 figures and the victory point markers in the appropriate colours. The miniature-accurate cut helps you sort them. You can store colour balls, dice, special markers and number chips in the rectangular compartment. The soft, fine-pored foam reliably protects the detailed miniatures from damage during transport. The precisely cut shape also prevents them from sliding around or bumping into each other. Once you have painted your miniatures, you can be sure that the colours are protected from abrasion and annoying scratches. The four motherships find a suitable hangar in the fifth insert. Four precisely dimensioned compartments ensure that the rockets remain firmly and safely in their storage location. The rocket insert and the figure inserts are best placed first in the box. Place the foam mat on top of the lower inserts. Place the space quadrants and the friendship cards on top. Place the foam lid provided on top as protection. This way, nothing slips and your miniatures are well protected from all sides. Place the game instructions, almanac and room maps on the lid. Finally, place the card holder and the expansion box in the box. Put the lid on and you're done.
