from **95,13 EUR**

Item no.: 377399
shipping weight: 0.90 kg
Manufacturer: Feldherr

Product Description

If the Orks and Tyranids don't wipe each other out, then the Astra Militarum will have to smoke out the pests. The 23 models and 17 terrain pieces in the Octarius box are bursting with fine detail. The matching Feldherr DSL310 storage box including foam is available to ensure that none of them are damaged on the way to the next game. The included Feldherr foam inserts ensure that no platform collapses, no weapon suffers premature material fatigue and your models can be safely stored and transported. To protect your miniatures, we have packed 4 full-size and 1 half-size foam inserts in the box. In addition to the 23 figures from the "Kill Team: Octarius" set, you have space for more than 90 additional miniatures. This allows you to expand the two existing Kill Teams in a targeted manner, as well as bring more Kill Teams into the conflict. Whether it's a Breacha Boy or a veteran of the Astra Militarum, each miniature has a suitable compartment. The miniatures fit snugly thanks to the precise cut. Even if the models are given a good shake during transport and the rubble flies around their ears, the figures remain in place. We have equipped the storage box with grid foam and matching bases for your terrain and rangefinders. This allows you to customise the compartments as you wish. To do this, simply remove the grid pins in the shape of the terrain piece to be fitted. Thanks to a self-adhesive side, the grid foam can be easily glued to the base. If the large terrain pieces protrude slightly, the double-size grid foam also includes a matching lid made of grid foam. Simply remove the pins from the grid foam at the height of the protruding buildings and place the grid foam on top of the insert. This also provides optimum protection for protruding buildings. The soft, fine-pored foam protects intricate details such as weapons, shovels and ladders from breaking off and the colours of your painted models from scratches and paint abrasion. Once your miniatures and buildings have been supplied and packed, we take care of your game material. The half-size insert with seven compartments helps you to organise all your cards and game material such as tokens and dice. The card compartments have finger-thick cut-outs to make it easier for you to remove the stacks of cards. Of course, the cards also fit into the compartments with protective sleeves. The set includes matching foam lids to prevent your miniatures from deserting before the mission or your buildings from falling out of the inserts. This way, everything stays in the compartments and is optimally protected from all sides. The set is only suitable for the miniatures, cards and game material such as dice and tokens. The game board is placed on the foam lids. The Octarius War Manual and the basic manual for Kill Team do not fit in the storage box and must be transported separately. The DSL310 storage box is made of coated, double-walled cardboard and is therefore very light yet sturdy. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport.
