DSLB310P21 - Storage Box DS for Chaos Space Marines

from **100,13 EUR**

Item no.: 377401
shipping weight: 0.90 kg
Manufacturer: Feldherr

Product Description

Our DS storage box for Chaos Space Marines finally brings order to the chaos: filled to the brim with high-quality foam, Vex Machinator, Land Raider, Venomcrawler and co. are perfectly organised and ready for battle at all times. Of course, the fine-pored Feldherr foam also reliably protects your exclusive models from damage - fragile parts remain undamaged and the sensitive surfaces of painted models are spared scratches and abrasion. The foam insert for Vex Machinator has three compartments - a large, customised compartment for the Lord of the Machines and two smaller compartments for Obliterators, Havocs or character models. The two foam inserts HSLZ060BO each have seven compartments of different sizes and are ideal for expansive models with heavy armaments, such as Havocs or Terminators. The insert for Noctilith Crown has three compartments - a customised compartment for the large model and two smaller compartments for Havocs, Obliterators or character models, for example. The insert for the Land Raider is divided into six compartments. Two miniature-specific compartments are available for one Land Raider each, while four smaller compartments provide space for additional models. You can safely store one Venomcrawler in each of the large compartments of the two HSMEME110BO inlays. In addition, each of the two compartments can hold up to four larger miniatures such as Obliterators, Greater Possessed and Master of Possession. The two small compartments of the two inlays are suitable for simple Chaos Space Marines on 32 mm bases. The two HSCW075BO inlays each have 12 compartments. Two large compartments are ideal for large miniatures, such as the Black Legion commander Abaddon the Despoiler. The two medium-sized compartments can be filled with Obliterators, among other things. The standard warriors of your Heretic Astartes Legion fit into each of the eight small compartments. Finally, the set includes a 60 mm high foam tray in which you can safely store models of your choice. The insert is pre-perforated with a 14 mm x 14 mm grid. To adapt it to your model, remove the corresponding foam segments. Then glue the inlay to the foam base supplied - done. Naturally, the inlays fit perfectly into the DSLB310 storage box. This is made of coated, double-walled cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects your collection from dust and other external influences. The two plastic-reinforced carrying handles on the sides make it easy to transport the box.

Technical details- High-quality, fine-pored foam - Made in Germany- Chlorine-free and acid-free
