## FS20SET - Foam set for Monolith + Ghost Ark

from **22,93 EUR**

Item no.: 379799  
shipping weight: 0.10 kg  
Manufacturer: Feldherr

### Product Description

Two-piece set for safely storing and transporting a Necron Monolith and a Necron Ghost Barque. The Monolith - used as an armoured personnel carrier or troop transporter by the Necrons - is made of the living metal Necrodermis, like all of their constructs. The partially conscious alloy can repair damage in a very short time and even armour-piercing missiles simply bounce off the hull. Stopping it therefore requires a lot of patience and firepower. Meanwhile, the Ghost Ark brings in infantry supplies. As the two Citadel models are unfortunately unable to repair their own damage, we have the matching Feldherr foam insert to protect a Monolith and a Ghost Ark. One compartment is tailored precisely to the Necron Monolith. This fits with or without a base. Completely wrapped in high-quality, soft foam, the sensitive details, such as the Gauss flux projectors, are just as well protected against damage and scratches as the colours and decals of the fully coloured miniature. The compartment is suitable for both the old Monolith model (from 3rd edition) and the new 9th edition model from 2020. The Ghost Ark finds a safe place in the compartment next to it, so that it and its crew are also well accommodated. The height of the set is designed for a Ghost Ark without a flight base. The second insert is placed on top. This means that the remaining parts of the miniatures are also safely packed in foam.

Set consists of - 1 foam insert as top section for Monolith + Ghost Ark (FSMEPG110BO) - 1 foam insert as bottom section for Monolith + Ghost Ark (FSMEPG055) Full-size foam inserts Dimensions- FSMEPG110BO: 345 mm x 275 mm x 110 mm total height (100 mm usable height + 10 mm base)- FSMEPG055: 345 mm x 275 mm x 55 mm total height Details- high-quality, fine-pored foam- chlorine-free and acid-free- Made in Germany
