from **48,83 EUR**

Item no.: 377997
 shipping weight: 0.10 kg
 Manufacturer: Feldherr

Product Description

The comfortable MAXI bag filled with two foam inserts for 1 Knight Castellan, 2 Imperial Knights and 25 other models of the Adeptus Mechanicus. They have a monopoly on the research and development of weapons and high technology of the Imperium. As fragmented as the Adeptus Mechanicus may be within the organisation, they are united by this privilege, along with a fervent belief in the Machine God. Such an animated army of cyborg warriors, priests and god-machines represents a truly fearsome opponent for any of their enemies. With our MAXI bag including foam inserts, you can take your army to the next battlefield unscathed. The set includes:- 1 Feldherr maxi-bag- 1 full-size foam insert for Knight Castellan and Imperial Knights (FSMEEF130BO)- 1 full-size foam insert with 25 compartments (FSLQ040BO)- 1 matching foam lidThe Knight Castellan is a mobile, towering Dominus-class fortress and the main artillery platform in the Knight House ranks. To ensure that the shieldbreaker missiles, volcano lance and plasma decimator remain ready for use, the matching foam insert ensures that this fighting machine is properly stored away from the battlefield. The mat is divided into 4 individually customised compartments. The gigantic Knight Castellan can be safely stored here in two parts - upper part with weapon unit and lower part with barrel unit. Surrounded by foam, the sensitive parts of the miniature are optimally protected, even during transport. To make your ranged combat unit complete, the mat has 2 additional compartments that are customised for two Imperial Knights miniatures. The storage in individual customised compartments not only protects the sensitive parts of the detailed GW models, it also prevents the figures from sliding around and bumping into each other. This prevents the painstakingly painted figures from chipping. Because fighting machines alone do not make a complete force, we have created space for the cold-blooded warrior units of the Adeptus Mechanicus with the second foam insert. With 25 compartments, it offers space for the relentless hunters, the Skitarii Rangers, as well as the fearless Rad Troopers, the Skitarii Vanguard. And because a good Mechanicus army must not lack religious mania, this foam mat can also accommodate the Fulgurites or Corpuscarii Electro-Priests. This means that radium carbines and the Skitarii Galvanic Rifles are just as well protected from damage as the Electro-Absorber Rods and Electro-Fists of the Lumines. A matching foam cover completes the all-round supply of your Adeptus Mechanicus army and your units are ready for the next battle in the name of the Machine God anytime and anywhere. The comfortable MAXI bag is made of particularly hard-wearing material. In addition, padded side panels and a reinforced base ensure that your Mechanicus army is optimally protected from external influences, even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip on the front. Datacards and codex, for example, fit in here. There is a rubberised, handy carrying handle on the top. If you prefer to have your hands free, you can also use the bag as a shoulder bag thanks to the wear-resistant, detachable shoulder strap. - Each of the 25 compartments on the FSLQ040BO insert is 54 mm long x 41 mm wide x 30 mm deep. The foam inserts have the following dimensions:- Insert FSMEEF130BO: 345 mm x 275 mm x 130 mm total height (120 mm usable height + 10 mm foam base)- Insert FSLQ040BO: 345 mm x 275 mm x 40 mm total height (30 mm usable height + 10 mm foam base) Dimensions of the Feldherr MAXI bag:- Internal dimensions: approx. 345 mm x 275 mm x 180 mm- External dimensions: approx. 390 mm x 330 mm x 190 mm- High-quality, fine-pored foam - Made in Germany- Chlorine-free and acid-free
