Product Description

Krondy is the son of Dracothion himself. He has inherited some of his titanic father's powers. In order to defeat the enemies of order, he not only relies on his razor-sharp claws, but also conjures up devastating storms that level entire armies to the ground. The fantastically designed model also triggers storms of enthusiasm away from the battlefield. The huge model sits enthroned on a 160 mm base and is characterised by finely modelled details. To ensure that the dragon retains its wings and that the modelled scratches remain the only scratches on the colossal model, we provide the matching Feldherr foam set to protect your miniature. The large compartment is tailored precisely to Krondy, son of Dracothion or his alternative model Karazai, the Marked One. The smaller compartments offer space for various Stormcast Eternals miniatures such as Lord Dominus Bastian Carthalos, Gardus Steel Soul, Annihilators and models of a similar size. Each miniature in your collection has its own customised compartment. This keeps your models safely in place during transport. The soft foam not only protects the delicate parts of your figures. The colours of painted miniatures are just as safe from abrasion and scratches. As the dragon protrudes a little, the set includes a foam mat. Simply remove the pins from the grid foam at the height of the protrusions and place the grid foam on the inlay. This provides optimum protection for your miniature.
