Product Description

Don't let anyone look at your cards. Practical table stands for playing cards in the most common formats - also suitable for sleeved cards. You don't want to play with face-up cards, but are still looking for a way to organise your cards in front of you? Then this inexpensive Feldherr plastic card stand package is just right for you. You get four table stands that support you on the gaming table and work with many card game systems such as Dixit, Magic the Gathering, PKM and Yugioh. Organise your most important cards, but thanks to the flat design you don't have to expose your whole hand. The slot for the cards is 179 mm long and 1 mm wide. This makes the card holders suitable for most card formats, such as:- Oversize, 79 mm x 120 mm- Standard American Card Game Size, 56 mm x 87 mm- Standard Card Game Size, 64 mm x 89 mm- Standard European Card Game Size, 60 mm x 92 mm- Tarot Size, 71 mm x 120 mm- Big Square Size, 80 mm x 80 mm. The cards also fit into the slot with protective sleeves. The open card slots are all on one level, so you can place cards one behind the other and hide them from the prying eyes of your fellow players. The open card slots allow the cards to protrude easily so that more can be packed in a row. Depending on the type of card, different numbers of cards can be placed next to each other. With standard cards, three cards fit next to each other. A total of 12 standard cards can be placed in each card holder. Additional feet on the back ensure improved stability and prevent the card holders from tipping over too easily. The set includes:- 4 Feldherr card holders for playing cards. One card holder has the following dimensions: 179 mm long x 40 mm wide x 10 mm high. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. All products are provided unpainted.- thermoplastic- made from renewable raw materials- no assembly required - ready to play- 3D printed in Germany
