If you paint your figures, you can also be sure that the colours will be protected from scratches and abrasion. Cards, dice and other game components can be sorted clearly and are quickly available. The card holders help you to store the small-format cards neatly. Of course, the cards also fit into the compartments with protective sleeves. The foam lids included in the set close the whole thing so that the miniatures are securely packed all round and do not bump against the lids of the box during transport. You can place the rulebook, scenario booklet and the City of Ruins booklet on the lids. The Raccoon City Dashboard can be stored upright next to the foam inserts. The FSLB310 storage box is made of coated, double-walled cardboard and is therefore very light yet stable. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport. The FSLB075 storage box is made of coated, double-wall cardboard. This makes it not only pleasantly light, but also particularly tear-resistant and stable. You can store your miniatures safely and protected from dust and transport them effortlessly with the practical plastic carrying handle. The magnetic box is the ideal solution for storage and transport thanks to its low weight and flat, rectangular shape. It is made of very sturdy, coated solid cardboard in a modern Feldherr design. The green box containing the foam mat is firmly glued to the casing. The solid casing also serves as a lid.
