## FSLB040P02 - Storage box FSLB040 for Star Wars X-Wing 2.0 - Wave 3

from **14,83 EUR**

Item no.: 377487  
shipping weight: 0.40 kg  
Manufacturer: Feldherr

### Product Description

With the third wave, your X-Wing collection gets a new addition from the Galactic Republic and the Separatists. To ensure that these ships are safely stowed away and reach the gaming table undamaged, here is the space-saving flat full-size storage box with the matching inserts. A half-size insert offers space for a model of the Sith Infiltrator. It fits into the customised compartment both with the wings folded in and out. The precise cut prevents the ship miniature from sliding around during transport and thus protects not only the wings from damage, but also the colours from abrasion and scratches. There is also a compartment for large bases and two for manoeuvre wheels (with and without upgrade). You can also store small bases in these compartments if required. The two compartments next to them can either be used for small bases or for storing small fighters. The remaining 5 compartments can be filled with small ship models (e.g. Vulture-class droid fighters, Z-95-AF4 head fighters or Delta-7 aethersprites). The second tray contains two large, customised compartments for the ARC-170 starfighters, two for V-19 torrens and two for the Jedi interceptor, the Delta-7 Aethersprite. There is also a compartment for large bases and three for manoeuvring wheels. And to ensure that everything is properly stowed away, there are a total of 12 cross-shaped slots between the compartments in which you can store the holding rods. Finally, the foam lid supplied ensures that everything is securely packed all round and survives transport to the gaming table undamaged. The two inserts are well stored in the Feldherr storage box FSLB040. This is made of coated, double-walled cardboard. This makes it not only pleasantly light, but also particularly tear-resistant and stable. Your miniatures and game material can be stored safely and protected from dust and easily transported thanks to the flat, compact shape.
