Two full-size and four half-size inserts provide each figure with its own custom-fit compartment. This prevents them from sliding around and bumping into each other during transport. This protects the colours of painted figures from scratches or abrasion. The soft foam optimally protects the fine, sensitive parts, such as claws, weapons or wings, from damage. The two half-size mats, each with 3 compartments for the large boss monsters - William Birkin 3rd Stage, Stage 5 and the Giant Alligator - still have 3 free compartments.- The 3 free compartments are each 120 mm long x 71 mm wide x 50 mm deep. 2 full-size inserts are available for sorting the game material. The cardboard pieces, such as dials, tokens and tiles, are placed on the insert with four large compartments. To prevent the tiles from sliding around in the large compartment, you also get a mat made of nubbed foam. Place this on top and everything stays in place. A second insert accommodates the cards and other accessories. The card compartments are available in two sizes. One for the large cards, such as the reference cards, and one for the small cards, such as the item cards. The compartments are suitable for cards with sleeves. The remaining compartments can be filled with dice, tracks and tokens. Finally, the foam lid supplied ensures that the miniatures in the top insert are completely surrounded by foam and do not bump into the lid when travelling. There is still space for the booklets between the topper and the box lid. The FSLB310 storage box is made of coated, double-wall cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects miniatures and game accessories from dust and other external influences. The two plastic-reinforced carrying handles on the sides make it easy to transport the box. The large Resident Evil 2 Kickstarter package is therefore compactly packed - all miniatures are safely stored, all game material is neatly stowed away and you are always ready for the next trip to Raccoon City.
