Each figure is allocated its own precisely fitting compartment. This prevents them from sliding around and bumping into each other during transport. The soft foam protects the tentacles from damage just as well as the weapons of your heroes. The colours of painted figures are also protected from scratches or abrasion. There are also plenty of compartments for the many cards, tokens, counters, markers and game board components. Here you can organise the game material clearly and save time and nerves when setting up the game. The card compartments for the normal playing cards (e.g. gear and artefacts) are of course also suitable for cards with sleeves. The foam lid supplied ensures that everything is securely packed and nothing falls out during transport. The FSLB250 storage box is made of coated, double-walled cardboard and is therefore very light and also particularly sturdy. The practical carrying handle makes the box easy to transport. One side of the box can be opened completely. This makes it easier to store and remove the foam inserts. Your "Shadows of Brimstone: City of the Ancients" base game is therefore compact and well protected - all miniatures are safely stored, all game material is neatly stowed away and you are always ready for your next trip to Brimstone.
