from **50,20 EUR**

Item no.: 377592
shipping weight: 1.50 kg
Manufacturer: Feldherr

Product Description

When life closes a door, a window usually opens somewhere - and then zombies climb in and eat you. Instead of the original board game box, this practical Feldherr storage box FSLB250 incl. foam inserts will help you survive the zombie calypse. In the storage box, all contents from the basic game of the Second Edition of Zombicide are always neatly stowed away and well protected. With every step you take, your 88 miniatures are in danger of scratches, bent and broken details. To protect your figures, we have packed 3 full-size and one half-size foam insert into the storage box. From the simple Zombie, to the various Survivors, to the giant Abominations, every model will find a customised compartment. The customised cut prevents the figures from sliding around and bumping into each other during transport. This protects intricate details and your painted models are spared colour abrasion and scratches. 2 inserts offer plenty of space for sorting your game material. Cards, tokens, ID cards, dice, board tiles, trackers and the Survivor Colour Bases each have suitable compartments. Two additional plastic card holders are included for the many small-format cards. You can fit these into the large card compartments of the half-size tray. Of course, the cards also fit into the compartments with protective sleeves. A grid foam is included for larger game material such as dashboards. Thanks to the grid, you can freely design the compartments and organise the game material as you wish. The included foam lid seals the deal. It ensures that the miniatures are protected from all sides. You can place the Rule & Missions Book separately on the foam lid. The FSLB250 storage box is made of coated, double-walled cardboard and is therefore both very light and particularly sturdy. With the matching foam inserts, miniatures, game material and all other goods can be stored safely and protected from dust - and easily transported with the plastic carrying handle. One side of the box can be opened completely. This makes it easier to put away and remove the foam mats. The inlays are either inserted from the top or simply pushed into the side of the box. Your miniatures and game material are now neatly stowed away and safely stored. Now the hunt can begin. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted.
