Product Description

Don't know how to store your board game or tabletop miniatures properly? The best way is in our FSLB250 storage box with the matching foam insert for up to 110 miniatures on a 40 mm base. The foam inserts have a total of 110 compartments in which you can store miniatures on a 40 mm base safely and neatly. The fine-pored foam offers the best possible protection against damage - delicate parts remain undamaged and the colour applied to painted figures is retained. The FSLB250 storage box is made of coated, double-walled cardboard and is therefore very light and also particularly stable. The practical carrying handle makes the box easy to transport. One side of the box can be opened completely. This makes it easier to put away and remove the foam inserts. This means that all models are safely stored, all game material is neatly stowed away and your game is optimally protected on the way to the next quest. The matching foam lid completes the set. Place it on top of the inlay so that nothing can fall out or bump against the cardboard lid unprotected during transport.
