from **47,34 EUR**

Item no.: 377582
shipping weight: 1.50 kg
Manufacturer: Feldherr

Product Description

Like so many imperial worlds, Necromunda is on the verge of collapse. Various gangs are fighting for supremacy in bloody gang wars. It's up to you to decide whether to pledge your allegiance to the insane Escher or the mysterious Delaque. No matter which gang you choose, this Feldherr storage box will help you to store the miniatures from the "Necromunda: Hive War" starter set neatly and transport them safely. The box offers space for all 30 miniatures, the terrain pieces and the remaining game material from the "Necromunda: Hive War" starter set from GamesWorkshop. All cards also fit with protective sleeves. The templates and measuring stick are stored on the foam lid. The rulebook and game board do not fit in the storage box and must be transported separately. All miniatures, terrain pieces, tokens and game cards are reliably protected from damage and neatly stored in a total of three full-size foam inserts and one grid foam insert. From the deadly Escher to the devious Delaque - all miniatures and each terrain piece have their own custom-fit compartment. The soft, fine-pored foam provides reliable protection for your figures during transport. You don't have to worry about scratches and chipped paint on your painted models or broken parts. A pre-perforated grid foam insert is included for particularly bulky terrain pieces, as well as for tokens and playing cards. To adapt it to your models or to create a suitable compartment, remove the appropriate foam segments and then glue the insert to the base supplied. Done! Finally, the matching foam lid ensures that your figures are securely packed all around. The templates and the measuring stick are stored separately on the lid. The FSLB250 storage box is made of coated, double-walled cardboard and is therefore very light and also particularly stable. With the matching foam inserts, miniatures, game material and all other goods can be stored safely and protected from dust - and easily transported with the plastic carrying handle. One side of the box can be opened completely. This makes it easier to put away and remove the foam mats. The inserts are either inserted from the top or simply pushed into the side of the box.
