Product Description

A huge desert vortex has drawn you into a long-forgotten underground temple. Can you escape from the clutches of the quicksand - a dangerous trap made of gears and sand - in time? Quicksand is a co-operative real-time challenge in which you must work together to deactivate the quicksand, an ancient device powered by gears and sand. In your turns, you play cards to move and turn one or more hourglasses. You have to make sure that the hourglasses do not run out of time before you have deactivated the quicksand. But be careful! You must act neither too slowly nor too quickly, otherwise it will swallow you up forever. You can only escape if you work together as a team! Play your way back to the surface through all 21 quicksand difficulty levels.
