### Product Description

For safe and tidy storage of Magnus the Red, many different sized miniatures and up to 77 dice led by Magnus the Red and equipped with the power of the Warp, the troops of the Thousand Sons march into battle. They have only one goal in mind: to see the Empire burn. To ensure that the one-eyed commander and his retinue can march into the next battle in full force, you should keep them safe and well organised. Our storage box with matching foam inserts offers you a customised solution for this. The foam insert for Magnus the Red is precisely tailored to the army commander of the Thousand Sons. The magnificent details of the marvellous figure, such as Magnus' blade and the huge wings, are thus optimally protected against damage. The fine-pored foam also reliably protects the surface of the Daemon Primarch of Tzeentch. So when you have painted the model, you can be sure that the paint you have applied will remain intact. In addition to the large compartment for Magnus the Red, the insert has 4 further, smaller compartments. These are ideal for storing other figures from the Thousand Sons command staff, such as Scarab Occult Terminators or Exalted Sorcerers. Each of the 4 compartments is 60 mm long x 51 mm wide x 115 mm deep. The two inlays, each with 10 compartments, provide a safe haven for a total of 20 loyal warriors of the Tzeentch. The different sized compartments of the mat are ideal for storing larger or wider models such as Rubric Marines or the Aspiring Sorcerer. You can safely store additional warriors in the two foam inserts with 15 compartments each. The different sized compartments are suitable for both standard warrior models and larger Thousand Sons models. For example, the small compartments are ideal for Chaos Cultists, the medium-sized compartments for Scarab Occult Terminators or Rubric Marines, and the large compartments provide space for character models such as the Chaos Sorcerer Ahriman. Another foam insert with 32 compartments provides space for standard warrior models on bases up to 32 mm in size. Here you can keep miniatures the size of Rubric Marines, for example, well organised. Each of the 32 compartments is 54 mm long x 35 mm wide x 40 mm deep. Finally, the set contains an insert with 77 small compartments for dice. The 77 compartments in the insert are each 14 mm long x 14 mm wide x 15 mm deep. This means you can store W6 cubes with an edge length of up to 14 mm in the mat. The stackable inserts fit exactly into the sturdy storage box. To level the two stacks of inserts, we supply a foam lid for height levelling. Another foam lid acts as a cover to ensure that nothing falls out of the top insert or hits the lid of the storage box. The storage box is made of coated, double-wall cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make it easy to transport.
