Product Description

The sturdy Feldherr storage box including 8 foam inserts for miniatures and game material from 2 expansions and 2 hero and monster sets. Dark forces are stirring again in the dark alleys of Nerekhall. In the ruins of Sudanya on the edge of Terrinoth, a forgotten city lies dormant, harbouring deep secrets, powerful artefacts, unknown dangers and horrific creatures. Once again, new adventures await your heroes and terrible monsters cross their paths. This means lots of fun and a whole host of new miniatures and game accessories. To make it difficult for you to keep track of everything in the labyrinth, we have a sturdy storage box with matching foam inserts to keep your Descent collection safe. 4 custom-fit foam inserts protect your hero and monster miniatures. Whether carrion dragon, Volucrix hunter or Vyrak the falconer, each miniature has its own compartment. This means that the delicate parts of the plastic figures are optimally protected from damage and the wings and horns of the demon lords remain intact. The individual storage of the figures also prevents them from sliding around and bumping into each other. This also protects the colours of painted miniatures from abrasion and chipping during transport. 3 large foam mats help you organise the game material. Game board pieces, dice and game markers can be clearly sorted into the corresponding compartments so that you always have an overview and no plastic base gets lost. Large cards, such as overlord and captain cards, as well as small cards, e.g. class or market cards, fit into the compartments provided with or without sleeves. All game materials are therefore quickly to hand and the time and nerves you save on setting up the game can be invested in the game instead. The total of 8 foam mats provide space for figures and game material from the "Descent: Journey into Darkness Second Edition" expansions Shadow of Nerekhall & Labyrinth of Doom and from the two hero and monster sets Contract of the Undeclared & Awakening of the Wilds. There are also additional compartments available that can be filled with miniatures from the Captain sets. Another foam insert with 25 compartments allows you to safely store figures from future expansions and/or other game material, for example. Finally, a matching foam lid ensures that everything is securely packed all around and that nothing bounces against the lid even on bumpy paths. Of course, the inserts fit exactly into the storage box. This is made of coated, double-walled cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects the contents from dust and other external influences. In addition, plastic-reinforced carrying handles ensure that you can transport the box easily.
