Product Description

With your subscription, you have taken the plunge into the dark 41st millennium and your army is growing by the month. Now that the first miniatures have been painted, you're wondering how best to store them. Here's your answer. With this foam-filled Feldherr storage box, you can ensure that your Space Marines are always in good hands and arrive at the gaming table safe and sound. A total of 9 half-size foam inserts provide a safe home for the models in your Primaris army. One insert is specially designed for the Repulsor. It offers a customised compartment for the Primaris Repulsor, tailored precisely to the Primaris Space Marines' armour. This ensures that its huge arsenal of weapons remains undamaged on the armour. The heavy assault gatling cannon on the turret and the twin bolter at the front remain intact during transport, as do the radar antennas. The turret gets the small compartment next to it. You also get a specially made insert for the Redeptor Dreadnought. Here you have space for two models at once, because you can never have enough of these mighty war machines. The landspeeder and the bike squad are stored in the HSMJJK100BO. Embedded in high-quality, soft foam, the many intricate details of your models are protected from breakage and other damage. The colours and decals of the painted miniatures are also safe from abrasion and scratches here. Character models with extensive details, the Inceptors and the Attack Bikes find suitable compartments on the two HSLM050BO. Your Reivers, Hellblasters, Intercessors and other standard units get 3 inserts with 10 compartments each. And finally, the aggressors also get a safe home in the form of the HSLM050BO half-size tray. The supplied foam lid closes things off and ensures that the miniatures in the upper tray are also prepared for the next battle. The FSLB310 storage box is made of coated, double-walled cardboard and is therefore very light yet stable. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport.
