## FSLB310P60 - Storage box FSLB310 for Idoneth Deepkin

from **51,82 EUR**

Item no.: 377631  
shipping weight: 1.00 kg  
Manufacturer: Feldherr

### Product Description

The Idoneth Deepkin attack their enemies like a swarm of piranhas. With this robust Feldherr storage box including foam inserts, you'll be perfectly equipped for your raids. It allows you to safely store up to 49 models and transport them to the next battle. Two full-size and three half-size foam inserts serve as a safe enclave for your maritime forces. Precisely dimensioned compartments for each model prevent the figures from sliding around or bumping into each other during transport. This ensures that the weapons and fine details do not bend. The soft foam also protects the colours of the painted figures from abrasion and scratches. With so many sea creatures in one place, the full-size foam insert FSMEEG145BO with its eight compartments could easily pass for an aquarium. The mighty Akhelian Leviadon has a custom-fit compartment for storing the miniature. The matching Citadel oval base and the flying base stand are stored in a separate compartment. There are three compartments for the Akhelian Morrissarr Guard to bask in. Another compartment is precisely tailored for the Akhelian Allopex. There is also a compartment reserved for Lotann, Warden of the Soul Ledgers, so that someone can look after the captured souls. There is also a free oval compartment for an Isharann, for example. Place the core troops of your army in the second full-size foam tray. It is ideal for storing Namarti Thralls, Namarti Reavers and models with similar dimensions. There is space for up to 22 miniatures in the compartments of the insert. The insert with ten compartments provides sufficient space for larger miniatures on bases up to 40 mm. In addition to standard infantry such as Namarthi Thralls or Reavers, you can also safely store expansive miniatures such as the Tidecaster. You can safely store and transport up to seven Idoneth Deepkin warrior models in the half-size insert with seven compartments. Namarti Thralls, Namarti Reavers and models with similar dimensions will find a safe place here. You can safely store your Eidolon of Mathlann in the high half-size foam insert. Regardless of whether you build him as an Aspect of the Sea or Aspect of the Storm, the fragile figure has a customised compartment in both build variants. In addition, there are two smaller compartments for a Lotann, Warden of the Soul Ledgers, and another figure. The foam lid supplied seals the box and ensures that your miniatures are well protected all round. The FSLB310 storage box is made of coated, double-walled cardboard and is therefore very light yet stable. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport.

Details- high quality, made in Germany- chlorine-free and acid-free
