from **64,47 EUR**

Item no.: 377504
shipping weight: 0.50 kg
Manufacturer: Feldherr

Product Description

The Kickstarter campaign for "Kemet: Blood and Sand" has rewarded you handsomely. 105 fantastic miniatures spread across the basic game, an expansion and five optional buys are yours to take into the field. This matching foam-filled Feldherr storage box FSLB310 ensures that they always cut a fine figure. The miniatures can be optimally protected in the practical box. The times when you had to worry about broken details and chipped paint are over. The set offers space for all miniatures, playing cards and the complete accessories of the basic game, the "Great Old Ones" expansion and 5 optional buys from the Kickstarter campaign for "Kemet: Blood and Sand" by Matagot. Three full-size and four half-size foam inserts, two foam covers made of nubbed foam and one foam cover ensure optimum protection for your miniatures and clearly organised game material. All game cards also fit with protective sleeves. The game board, turn order track, power tiles sheet, black/blue sandstorm overlay and the rulebook are placed between the studded foam lids. The five tiles displays and the token holder included in the base game are stored separately in the box. We have packed three full-size and four half-size inserts in the box to protect your miniatures and game material. Whether you want to safely store money-hungry Mercenaries, an Obelisk or the mysterious Cthullu, each of the 105 miniatures has its own compartment. Thanks to the precise cut, the miniatures do not slip and stay in place. Wrapped in fine-pored foam, this prevents delicate details from breaking or bending. The soft foam reliably protects your painted models from scratches and chipping paint. The set includes an insert with separate card compartments for sorting your playing cards. The finger-wide cut-outs make it easier for you to remove the stacks of cards. Of course, the cards also fit with protective sleeves. A half-size insert made of robust material is included for your individual boards. You can organise the rest of your game material (e.g. Veteran tokens, order markers) in the remaining compartments. We complete the set with the matching foam lids. These are placed on the top inserts. This way, your figures are protected from all sides and cannot fall out of the inserts and be damaged during transport. Place the game board, Turn Order Track, Power Tiles Sheet, Black/Blue Sandstorm Overlay and the Rulebook between the foam lids. Place the five tiles displays and the token holder included in the basic game on top. These are then covered with the matching foam lid. The FSLB310 storage box is made of coated, double-wall cardboard and is therefore very light yet sturdy. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport. All miniatures are safely packed, the game material is neatly stowed away and everything is well protected.
