from **61,60 EUR**

Item no.: 377522
shipping weight: 1.50 kg
Manufacturer: Feldherr

Product Description

Howdy! Welcome to the Wild West. Where blokes are still real blokes. Where you enforce the law with your revolver. Where your marksmanship defines your standing in society. At least, as long as you don't get eaten by dinosaurs from another world. With Shadow of Brimstone: Swamps of Death you can expect a crazy ride that will make your collector's heart beat faster with its fantastic figures. To ensure that your miniatures are well protected and you have your game material together, there is this matching foam-filled Feldherr storage box FSLB310. Four half-size inserts serve to protect your miniatures. Whether you want to safely store a trigger-happy Law Man Hero or the gruesome Harbinger, each of the 32 miniatures in the game has its own compartment. Thanks to the precise cut, the miniatures won't slip and will stay securely in place even during a wild ride. Wrapped in fine-pored foam, this prevents delicate details from breaking or bending. The soft foam reliably protects your painted models from scratches and chipping paint. Now that we've taken care of the safety of your miniatures, let's turn our attention to your game material. There are three full-size inserts available for the majority of your game material. Map Tiles, Hero Character Sheets, Enemy Record Sheets, Reference Charts and the Depth Track can be stored in the large compartment of the single insert, while the smaller game material and cards can be sorted into the other two inserts. A total of 6 separate card compartments with finger-wide cut-outs make it easier for you to remove the card stacks. Of course, the cards also fit with protective sleeves. You can distribute the rest of your game material (e.g. dice, counters) in the free compartments of the inlays as you wish. We complete the set with the matching foam lid. This is placed on the top inlay. This protects your figures from all sides and prevents them from falling out of the inlays and being damaged during transport. The two oversized map tiles and the instructions are placed on the lid. The FSLB310 storage box is made of coated, double-wall cardboard and is therefore very light yet sturdy. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make the box easy to transport. All miniatures are safely packed, the game material is neatly stowed away and everything is well protected. Yeehah!
