### Product Description

Safely store and transport a Winged Tyranid Swarm Tyrant - Also suitable for the 'Swarm Tyrant' or 'Swarm Ruler' variants. A truly monstrous creature, this Tyranicus Praefactor. Every part of its chitin-armoured body is dedicated to killing and maiming its enemies. Its psionic abilities are not just for spreading swarm consciousness - the most powerful of them fire bolts of pure warp energy at their enemies. The Swarm Tyranid is also a truly impressive miniature that deserves the protection it receives. To transport the leader safely to the battlefield, you can get the right foam insert here. A large compartment is tailored precisely to the miniature of the Winged Swarm Tyrant. This ensures that the many fine, delicate details - especially the monstrous, claw-armoured wings and the gripping scissor tail - are optimally protected from damage. Thanks to the precise cut, the figure does not slip around during transport. This also applies to the construction variants. This also ensures that the colours of the painted miniature remain intact. Whether as a swarm tyrant with or without wings, or as a swarm ruler - the model of the fits into the compartment in any construction variant. In addition to the tyrant, five other compartments offer you space for additional miniatures of your choice. 3 compartments are suitable for larger Tyranids, such as the Broodlord or Gargoyles, while the other two compartments can be used for small models or dice.
