from **159,51 EUR**

Item no.: 377330
shipping weight: 1.00 kg
Manufacturer: Feldherr

Product Description

All set for a maritime adventure at sea. But you don't know how to transport all the contents from the basic game and the Seafarer Pledge from the Kickstarter campaign for "The Everrain"? No problem landlubber, our Feldherr design department has already crossed a few waters and customised an ideal set for your needs. You will receive a robust Feldherr General370 bag including a storage box FSLB310 with protective foam inserts and a map box. So you can be sure that your miniatures are well protected even in rough weather and that your cards and game material are optimally sorted and correctly shipped. The set offers space for all contents of the basic game and the additional contents of the Seafarers Pledge, such as all unlocked stretch goals from the Kickstarter campaign for "The Everrain". The miniatures are optimally protected from damage and scratches by soft, fine-pored foam. A Feldherr deck card box TCHS105 including a card holder is available for your standard cards and large-format cards. In addition, smaller cards can be fitted in a foam insert. Of course, all cards also fit with protective sleeves. The game board, cardboard and silicone game board, cardboard and silicone player ship boards, avatar boards, enemy ship/island board and the port boards are stored on the storage box in the General370 bag. To do justice to the contents of the Seafarer Pledge, we have equipped the set with 1 full-size and 7 half-size foam inserts. To ensure that your miniatures survive the journey without damage and do not look like they have been "keelhauled" during transport, each of the more than 60 figures is given a custom-fit compartment. No distinction is made between rank and origin and the captain, his crew, the mad cultists and the Avatar of the Old One all have their own compartment. The miniatures fit snugly thanks to the precise cut. Even if the sea is more than rough during transport, the models do not slip and remain in place. Thanks to the soft, high-quality foam, you don't have to worry about scratches and chipped paint on your painted figures or broken details on your miniatures. Once your miniatures are stored, let's take a look at your game material. You can store the small-format cards and game tiles in the insert with the 3 small compartments and the very large compartment. For your large-format cards, we have packed a sturdy Feldherr card deck box including card deck holder and card dividers. This means you can organise your cards clearly and always know where they are. Of course, all cards also fit into their respective storage locations with protective sleeves. While you sort dice and clip bases into the free compartments of the foam inserts, a half-size foam insert with 16 compartments is available for the majority of your tokens. You decide how to organise your game material. Finally, cover everything with the foam lids. This ensures that your pieces are protected from all sides and no piece can mutiny and bump into the lid of the storage box during transport. The game board, cardboard and silicone game board, cardboard and silicone player ship boards, avatar boards, enemy ship/island board and the port boards are stored on the storage box in the General370 bag. The FSLB310 storage box is made of coated, double-walled cardboard and is therefore very light and stable. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make transport easier. The GENERAL 370 can be easily transported either with the abrasion-resistant, detachable shoulder strap or by hand with the shorter carrying strap. As soon as the bag is not needed, you can fold it up to save space and store it in the cupboard.

Details- high-quality, fine-pored foam - Made in Germany- chlorine-free and acid-free
