Product Description

Gigamon - children's game for 2 - 4 people aged 5 and up.

Really good children's games are hard to find. But Gigamon is one of them. It has not only proved this to numerous children, who love it idolatrously, but also to the jury of the As d'Or - the French equivalent of the Spiel des Jahres - where it won the title of "best children's game" in 2015.

At first glance, it looks like it's just a memo game. But there is much more to it. The constantly changing display and the special abilities of the little Minimons, which are easy for children to learn when they are revealed in pairs, mean that there is a lot of variety and it remains exciting right to the end, even when Super-Merker are playing.

Even adults have a chance here :).

Attention! Not suitable for children under 36 months!

- Age: from 5 years
- Number of players: 2 - 4
- Game duration: 15 minutes
