from **22,46 EUR**

Item no.: 379892  
 shipping weight: 0.10 kg  
 Manufacturer: Feldherr

### Product Description

Foam set with token holder for sorting the game material in the original game box. It has been several decades since four brave pupils of the master wizard Mentor faced the dark forces in the land. Now it's time for a new generation of heroes. The remake of HeroQuest presents the adventures of yesteryear in a new, modern guise. Detailed hero and enemy miniatures, plastic furniture and nostalgically designed game material will make your heart beat faster. We have made provisions so that you don't have to fight toothless monsters with broken weapons. We support you with the matching Feldherr foam set for your basic game box. You can store your miniatures and game material safely and neatly in it and transport it carefree to your next adventure with your friends. Two foam inserts ensure the safety of your miniatures and terrain pieces. You can store the hero and enemy miniatures in the lower insert and the various terrain pieces in the higher insert. Whether it's a mighty barbarian, a stone sarcophagus or a terrifying gargoyle, all models have their own customised compartment. You can store decorative elements such as rats or skulls directly with the corresponding terrain pieces or separately in one of the free compartments. The customised cut helps you to sort the figures and ensures that each miniature fits securely. Nothing slips out of place, even during transport through the darkest dungeons. Sensitive parts, such as swords, scythes or wings, are optimally protected from damage. If you have painted your models, you can be sure that the colours are still intact even after transport. There are additional compartments in the inserts and a plastic token holder for your game material. You can store your dice in three compartments next to the characters. Small game material such as tiles can be stored in the free compartments and in the plastic token holder. The token holder can be stored in the high insert. This can be easily fitted into the large compartment with a finger-thick recess. You can store your playing cards in the two compartments next to it. Of course, the cards also fit into the insert with a protective cover. Place the block with personality passports on the token holder. Once everything is safely and neatly stowed away, place two of the supplied foam lids on the inlays. The miniatures and accessories are now completely surrounded by foam. Place all the larger game components such as the rules book, screen, game board, challenge book and oversized cardboard pieces on the lid of the top tray. Finally, the last lid is placed on top and protects the large game components from damage. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted.
