from **33,41 EUR**

Item no.: 379812
shipping weight: 0.30 kg
Manufacturer: Feldherr

Product Description

For safely storing and transporting a Mûmak model for the Middle-earth tabletop strategy game from GamesWorkshop. After the gigantic elephant-like animals from Harad have been trained by the Mahûd, the Mûmakil are sent into battle, equipped with bridles and a war tower on their backs. As mighty and unstoppable as the Olifant may be on the battlefield, your model must first arrive there undamaged. With our foam set for your war mûmak, transport is safe and easy. The set consists of: - 1 full-size foam inlay with 1 large and 6 small compartments as the lower part (FSMEPE140BO) - 1 full-size foam inlay with 1 large recess as the upper part (FSMEPF140) A large compartment on the lower inlay is cut exactly to fit the miniature of Harad's war mûmak. Thanks to the precise cut, the model remains in place during transport. The soft foam not only protects the platform on its back and other fragile parts, it also protects the colours of your painted miniature from abrasion and scratches. You can use the 6 square compartments to store warrior miniatures, for example. - The six compartments are each 35 mm long x 35 mm wide x 130 mm deep. To make it easier to get the small figures out of the deep compartments, you can fill and raise them with our foam squares. HS040A003 is suitable for this purpose. To protect the towering combat platform on the back of the Mûmak, place the second foam insert on the lower part. The overlay is also cut to a miniature size. This also protects the fighting platform from damage. The full-size foam inserts have the following dimensions: - Lower section: 345 mm x 275 mm x 140 mm total height (130 mm usable height + 10 mm base) - Upper section: 345 mm x 275 mm x 140 mm total height - High-quality, fine-pored foam - Chlorine-free and acid-free - Made in Germany
