Surrounded by high-quality foam, your models are optimally protected. Especially delicate parts such as cannons and aeriels are reliably protected from kinking in customised compartments. Of course, the velvety foam also offers protection against damage to the surface - so once you have painted your miniatures, you can be sure that your little works of art will be preserved. Of course, the inlays fit exactly into the sturdy storage box. This is made of coated, double-walled cardboard and is therefore both very light and very sturdy. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make it easy to transport. This makes it easy to take your collection to the next battlefield. The set also includes a matching foam lid. This ensures that your models cannot bounce unprotected against the lid of the storage box.
