from **20,37 EUR**

Item no.: 379386
shipping weight: 0.30 kg
Manufacturer: Feldherr

Product Description

With this Feldherr organiser, nothing clumps together and your game material stays neatly sorted. Welcome to 16th century Prague. Create your own golem and protect the neighbourhood. But be careful. One small mistake could end in a catastrophe of biblical proportions and your golem could get out of control and raze everything in its path to the ground. And all because you've mixed up the game material. We've included the right organiser for you so that you can always keep your tokens together and the devil has no chance of making a mistake. It ensures that your basic game box stays tidy and that every token can be clearly organised. This gives you full control over your creation. The organiser offers space for all the game material from the "Golem" base game. The set fits into the original base game box. The organiser replaces the original plastic insert supplied. However, you can still store it in the board game box for additional stability. All cards also fit in the card holders with protective sleeves (max. outer dimensions: 50 x 73 mm). The trays can be removed individually and can also be placed on the playing field. Place the instructions on the bottom of the box. The large research upgrade tiles, artefact boards, synagogue board, player board and game board are stored separately in the board game box. You can fit the assembled synagogue into the free space. Ready to use - No assembly required. While you create soulless monsters from clay, we take care of the order in your board game box. 4 token holders and 1 card holder made of plastic ensure that your small game material remains clearly organised. This saves you time-consuming pre-sorting and allows you to invest the time you save in the game. For a quick start to the game, take the trays out of the box and spread them out on the table. This way, you have everything ready to hand and where you need it. Tidying up is also quick and easy thanks to the clear structure of the organiser. The set consists of: - 1 plastic token holder with 5 compartments for small game material such as wooden figures (rabbits, students, golems, player markers, sorted by colour), bars and marbles. - 1 plastic token holder with 3 compartments for small game material such as artefact upgrade tiles. - 1 plastic token holder with 12 compartments for small game material such as menorah markers, clay bricks, coin tokens, knowledge markers and upgrade tiles. - 1 plastic token holder with 4 compartments for game material such as starting tiles, Golem upgrade tokens, research upgrade tokens (small) and action tokens. - 1 plastic card holder with 2 card compartments for game cards such as character cards, task cards, book cards and the overview card, as well as 5 compartments for game material such as neighbourhood tokens, pass tokens and artefact upgrade tokens. The organiser has the following dimensions: 302 mm x 215 mm x 68 mm high. - thermoplastic - made from renewable raw materials - no assembly required - ready to play - 3D printed in Germany. As with all 3D printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. All products are provided unpainted.
