Product Description

Even after death, service to the Emperor does not end. There is no better proof of this statement than "The Triumph of Saint Katherine". On a 120 mm round base, GW presents both a battle-hardened unit and an impressive diorama that embodies the funeral procession for Saint Sister Katherine. Consisting of several figures, covered with intricate details, the model leaves a lasting impression on players and opponents alike. To ensure that this impression is preserved for times to come, we have put together a practical Feldherr foam set for your delicate model. Thanks to the Feldherr foam insert and the enclosed supporters, the finely detailed miniature can be transported reliably protected. The foam set consists of a half-size foam insert with 5 compartments and a half-size foam insert with 18 perforated spacers with a self-adhesive underside. The pieces can be fixed in place using the self-adhesive underside. Simply peel off the film and stick it in the desired position. This allows several supporters to be stuck on top of each other. The largest compartment of the insert is used to store the Triumphzug. To ensure that it has a non-slip stand and no parts stand free without support, glue some of the supporters into the compartment to stabilise it. The smaller compartments offer space for infantry models on 32 mm bases, such as Canoness Veridyen, Ephrael Stern & Kyganil or an Imagifier. Thanks to precisely fitting compartments, your models stay in place during transport. The soft foam not only protects the delicate parts of your figures. The colours of painted miniatures are just as safe from abrasion and scratches.
