Product Description

A Warsong Revenant makes quite an impression on and off the battlefield. On the battlefield, it is a great help to any Sylvaneth army with its music and fighting power. Off the battlefield, this finely detailed model will impress with its detailed design. To ensure that the model remains a blessing and transport does not become a curse, we have put together a practical Feldherr foam set for your delicate model. Thanks to the Feldherr foam insert and the enclosed supporters, the finely detailed miniature can be transported without any problems and is optimally protected against damage. The foam set consists of a half-size foam insert with 5 compartments and a half-size foam insert with 18 perforated spacers with a self-adhesive underside. The pieces can be fixed in place using the self-adhesive underside. Simply peel off the film and stick it in the desired position. This allows you to stick several supporters on top of each other. The largest compartment of the insert is used to store your Warsong Revenant. To give it a non-slip stand, glue some of the supporters into the compartment to stabilise it. The smaller compartments offer space for Treelord Revenants, Yltharis Guardians or models of a similar size. Thanks to precisely fitting compartments, your models stay in place during transport. The soft foam not only protects the delicate parts of your figures. The colours of painted miniatures are just as safe from abrasion and scratches.
