Manufacturer: Pegasus Spiele

Product Description

ISS Vanguard is a co-operative board game for 1-4 players that offers countless adventures on dazzling alien worlds and in distant star systems. Players control the four sections of security, reconnaissance, science and technology on board the ISS Vanguard - the first spaceship to venture into deep space to save humanity. The gameplay consists of two main parts: planetary exploration, where players land on coloured game boards representing alien worlds, and ship management, where players use the ship's log to upgrade the ISS Vanguard, recruit new crew members, conduct research, manufacture new equipment or landers, among other things. This game can be played either as a replayable, long, cooperative campaign with epic stories, dynamic gameplay and difficult decisions - or in the form of individual missions: stand-alone missions that are completed in a single game session. What will you do to fulfil your mission? What role will your spaceship play in the galaxy? Can you solve the puzzle of the eons-old star map contained in our DNA? The bridge is yours - take command! Important notes: Warning! Not suitable for children under 36 months. Details - Language: German - Playing time: 120+ minutes - Dimensions: 38cm x 33cm x 16cm
