Product Description

Song of Ice & Fire: Crannogman Trackers (EN Expansion)

Compared to other Northmen, the trackers of the pile-dwellers are quite daintily built, but it is their inconspicuous appearance that makes them so deadly. Since they are difficult to spot and are almost never seen, trackers are used to track and scout larger forces or to advance into unprotected enemy flanks. The trackers would not stand a chance in a battle against regular infantry units and therefore cannot be used in the actual battle. Except for cavalry, hardly any enemy unit can match their high mobility. Clever army leaders are aware of the trackers' weaknesses, but are happy to accept them in order to use their absolute lethality on the battlefield to their advantage.

The unit expansion A Song of Ice & Fire - Crannogman Trackers contains twelve trackers, a guardian, a unit card, a reinforcement card and a movement tableau.

To play the expansion, an A Song of Ice & Fire - Stark vs. Lannister starter set is required.
