Product Description

Multi-level table stand for playing cards in the most common formats ensures order and the necessary overview on the gaming table - also suitable for sleeved cards. Tired of constantly looking through the cards in your hand because you've forgotten which card was at the beginning? No problem, with the practical table stands for your cards you can place them clearly in front of you and the multi-level structure means that the cards at the back are also visible. This means you'll have more fun playing the game straight away. With this inexpensive Feldherr card holder pack made of plastic, you get four table stands that support you on the gaming table and are compatible with many card game systems such as Dixit, Magic the Gathering, PKM and Yugioh. The slot for the cards is 179 mm long and 1 mm wide. This makes the card holders suitable for most card formats, such as:- Oversize, 79 mm x 120 mm- Standard American Card Game Size, 56 mm x 87 mm- Standard Card Game Size, 64 mm x 89 mm- Standard European Card Game Size, 60 mm x 92 mm- Tarot Size, 71 mm x 120 mm- Big Square Size, 80 mm x 80 mm. The cards also fit into the slot with protective sleeves. Thanks to the tiered design, even cards standing one behind the other are visible. The open card slots allow the cards to protrude easily so that more can be packed in a row. Depending on the type of card, different numbers of cards can be placed next to each other. With standard cards, three cards fit next to each other. A total of 12 standard cards can be placed per card holder. Additional feet on the back provide improved stability and prevent the card holders from tipping over too easily. The set includes:- 4 Feldherr card holders for playing cards. The card holder has the following dimensions: 179 mm long x 51 mm wide x 48 mm high. As with all 3D-printed models, there may be minor imperfections. The product images are only examples of what the finished product may look like. All products are provided unpainted.- thermoplastic- made from renewable raw materials- no assembly required - ready to play- 3D printed in Germany
