Product Description

This DIY book nook transports you to a romantic wonderland of cherry blossoms and immerses you in the beauty of traditional Eastern architecture. Robotime-Rolife Falling Sakura TGB05 is a creative DIY book nook kit in the form of a miniature house. We have provided you with everything you need to build this mini cherry blossom wonderland - with all the wooden parts and tools, and you will gradually recover the entire "Falling Sakura" scene such as the buildings, the mountain valley, the moon, the trees, the river, etc. etc. You will feel the romance of spring during the entertaining and captivating assembly process. When finished, this "Falling Sakura" book corner set will also be a unique and exquisite decoration for your bookshelf and desk. It looks even more beautiful when you place it in the dark with a warm light switched on.
