Product Description

Robust Feldherr Case with 2 foam inserts for safe storage and transport of the Star Wars X-Wing Second Edition: Basic Game - space for 10 additional ship models Your fleet is on its approach when several Imperial fighter battle groups suddenly cross your path. A fierce skirmish begins and only with the right strategy and flying finesse will you be able to win the battle. For the 2nd edition of X-Wing, FFG has overhauled and refined the mechanics. This means you can enjoy more intense space battles and more daring manoeuvres than ever before in a galaxy far, far away. Whether at the speed of light, ridiculous speed or insane speed, with this Feldherr set for the basic game of the Second Edition of Star Wars X-Wing, you can store and transport entire fleet formations safely and conveniently. And you'll have everything organised and ready for the next game night. The 45 mm high foam insert (HS045XW01) allows you to safely and conveniently store and transport all miniatures and game materials from the FFG base game. The precisely fitting compartments offer you enough space to neatly organise your playing cards, bases, tokens, markers and manoeuvring wheels and to keep your miniatures safe. The tie fighters are stored in two of the three small rectangular compartments, while the 8 ship markers are placed in the remaining compartment. The T-65 X-wing and the manoeuvring wheels go in the round compartments. Sort the 13 ship cards, 4 quick-build cards and the 20 upgrade cards into the large rectangular card tray. Place the obstacles on top. Next to it, in the small card compartment, you have space to store your 33 damage cards. Bases and flying sticks go in the large rectangular compartment with a rounded edge. The remaining compartments are for your 6 dice and small markers, such as target acquisition markers, ion markers, etc. You can store up to 10 additional small ships in the HSBE035BO foam insert, so that you always cut a good figure even in larger battles. The foam lid supplied is on top and ensures that everything stays in the insert when travelling and that the models do not bump against the lid of the case. The 11 manoeuvre templates, the scale and the quick start guide can either be placed on top or in the inside pocket of the box. The HS Case 90 is made of durable yet pleasantly lightweight EVA. The black polyester cover and the non-slip shape provide an elegant finish and the contents are optimally protected from external influences. An inner pocket with zip offers additional space for sheets, writing materials and other small items.
