### Product Description

In the 1986 film Top Gun, the MIG-28 was portrayed as an antagonistic aircraft facing F-14 Tomcat fighters piloted by the main characters. Although there is no real-life equivalent, the MIG-28 gained popularity thanks to the film "Top Gun" and has become an iconic element of pop culture. However, the film fiction contains a grain of truth! The familiar silhouette of the mysterious MiG-28 is no secret to aviation experts. The film's villain is the famous Northrop F-5 Freedom Fighter, which was invented for the film! With 332 COBI bricks, you can build an amazing aircraft from a mysterious foreign power that dared to stand in the way of American F-14 pilots! The licensed set has been built with the utmost attention to detail and based on the plans of the F-5 Freedom Fighter aircraft. The characteristic black colour and the emblems with red star make it impossible to confuse with other aircraft! The aircraft has movable ailerons, armament and removable landing gear. The pilot's cabin opens and you can place a simplified figure with helmet and the characteristic red film star in a yellow circle! The set includes a presentation stand made from clip-on bricks and a nameplate with the Top Gun logo! The 1:48 scale model complements the aircraft collection of the TOP GUN series (F-14 TOMCAT, F/A-18, P-51 Mustang). Fans of the Armed Forces collection will have no problem adding the MiG-28 to their collection. Build it!
