Product Description

The Galactic Republic is reeling under the ever-increasing strength of the Separatists. Now it is up to heroic pilots like the Jedi Knight Obi-Wan Kenobi and his squadron to protect the Republic from tyranny and chaos. The best way to protect the Guardians of the Republic is with this customised foam insert, specially designed for your miniatures. There is a miniature-specific compartment for each of your ships on this half-size insert. The customised cut ensures a tight fit so that the ship miniature stays in place during transport. This not only protects delicate parts such as wings, antennas and weapons from damage, but also the colours from abrasion and scratches. There are two large, customised compartments for the ARC-170 starfighters, two for V-19 torrents and the Jedi interceptor, the Delta-7 Aethersprite, can also be accommodated twice here. In addition, you get a compartment for large bases and three for manoeuvre wheels. The latter fit in here with and without upgrades. You can also store small bases in these compartments if required. And to ensure that everything is properly stowed away, there are a total of 12 cross-shaped slots between the compartments in which you can store the holding rods. Details- high-quality, fine-pored foam - Made in Germany- chlorine-free and acid-free Dimensions- foam insert: 275 mm x 172 mm x 40 mm total height (30 mm usable height + 10 mm foam base)
