### Product Description

The Sator box contains all gameplay expansions from the "Black Rose Wars" Kickstarter campaign. Many new challenges and, above all, even more exclusive miniatures. With these two foam-filled Feldherr storage boxes, they are also well protected and the accessories are well organised. The set offers space for all miniatures and the complete game accessories from the Black Rose Wars: Sator Box. An additional insert can be filled with further miniatures and game material, such as from the "Hidden Thorns" expansion and the 4 Familiars. All cards also fit with protective sleeves. The Mage Sheets and the rulebook are stored on the foam cover. 2 Storage boxes filled with 8 customised foam inserts ensure that all miniatures and the entire game material from the "Black Rose Wars: Sator Box" are safely and neatly stored. From the Necrodragon, to the Mages, to the Nimbo - every figure has the right compartment here. Thanks to the precise cut, the miniatures stay in place during transport. The soft foam not only reliably protects the delicate details of the figures, but also the colours of painted models from damage, paint abrasion and scratches. The bundle comes with two inserts for sorting the numerous playing cards. Of course, the cards all fit here even with sleeves. You can distribute the remaining game material across the free compartments and decide for yourself how much you want to sort. The large hexagonal tiles, as well as the small playing cards (e.g. action cards) and the larger reference cards, can be stored in one of the 85 mm high inserts. Each box naturally also includes a foam lid. This provides the final protection from above. You place the booklet and the Mage Sheets on the cover. Everything is well stowed away in the high-quality LBBG storage box. This is made of coated, double-walled cardboard in a subtle Feldherr design. The lightweight material and carrying handle make it ideal for clearly organised storage and easy transport of your collection. All miniatures are securely packed, the game material is neatly stowed away and the contents of your Sator Box are optimally protected at all times.
