Product Description

All figures from the basic game plus 27 additional Descent figures and game material in one bag Do you often play Descent with your friends or meet up with other players for gaming sessions? The basic box should be relatively easy to transport. However, the larger and more customised your Descent collection becomes, the greater the need for a suitable transport option. Of course, we have thought about this for you and found a solution. The Feldherr MAXI bag for Descent: Journey into Darkness Second Edition comes completely filled with four customised half-size foam inserts and a large customisable grid foam insert. In addition to the prefabricated foam inserts, the set comes in the MAXI bag with a full-size grid foam insert. Thanks to the perforation (14 mm x 14 mm), you can customise this to suit your individual needs. If you still need space for cards or markers, for example, or for main men that are not yet accommodated in the other inserts, you can simply customise it yourself. Quick and easy. The foam insert measures 275 mm x 345 mm x 60 mm high. A 10 mm thick foam base is included in the set. The MAXI bag also contains the matching foam lid to protect the collection from above. Customised foam inserts prevent the figures from sliding around or colliding. Colours of painted miniatures do not flake off. Delicate parts, such as swords, claws or wings, are spared from bending or breakage. The high-quality MAXI bag has padded sides and a reinforced base, so that the contents are safe at all times, even when being transported by car or train. A sturdy strap also ensures better carrying comfort. Everything should be ready for the next trip to Terrinoth.
