Product Description

Are you ready to go into battle? Do you have your troops well organised and ready to hand at all times? To help you prepare for the next, perhaps decisive battle, we have put together a MAXI bag with matching foam inserts. The compartments of the two foam inserts, each with 36 compartments, are the same size. Each of the 72 compartments is 50 mm long x 25 mm wide x 25 mm deep. This makes the inlays ideal for storing rather small figures on 25 mm bases. Surrounded by fine-pored foam, your soldiers are protected in the ultimate way - filigree parts remain intact, applied paint remains intact. This means that larger infantry units can also be accommodated in this insert on 25 mm bases. The 60 mm high grid foam insert is pre-perforated. Foam segments with a base area of 14 mm * 14 mm can be removed individually from the insert. This allows you to configure the areas required for your armour types yourself. As soon as you have punched out the compartments, remove the film from the grid foam insert and glue the foam base to the insert - this ensures that your armour does not fall out. The inserts naturally fit exactly into the robust MAXI bag. This is made of particularly hard-wearing material. Padded side sections and a reinforced base also ensure that the contents are optimally protected from external influences, even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip at the front. Game sheets, books and similar items can be stored here. The set is rounded off with a matching foam lid. Place this on top of the top insert to ensure optimum all-round protection for your models.
