### Product Description

The box looks wonderful on your shelf. But would you like a handy and, above all, more convenient solution to take with you on the bus or train? Then our MAXI bag for Blackstone Fortress is the perfect choice for you. The explorer and enemy miniatures from the basic box are divided into a full-size and a half-size insert. The finely detailed figures are perfectly stored in 44 precisely fitting compartments and protected from damage during transport. Dahyak Grekh's long rifle remains just as ready for use as Vhorne's flamethrower. You no longer need to worry about your painted figures when travelling. They are neatly separated from each other in their compartments. This keeps the colours intact and free from scratches. The game material also comes with two foam inserts. There is a half-size mat with 5 compartments for the playing cards. Here you can neatly organise all the cards except for the encounter, initiative, explorer and enemy cards. All cards also fit with sleeves. You can store the remaining accessories on the second full-size insert in the set. There is one compartment for the small cards, one for the markers and one for the dice. In the large compartment you place the game board segments, stasis chambers, explorer and enemy cards, encounter cards, the database and the hidden vault. To prevent the game material from sliding around uncontrollably in the large compartment, you also get a nap foam insert. Place this on top and everything stays in place. The foam lid supplied ensures that the miniatures in the top insert are also completely surrounded by foam. The comfortable MAXI bag is made of particularly hard-wearing material. In addition, padded side panels and a reinforced base ensure that your miniatures are well protected from external influences, even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip at the front. This is a great place to store booklets and rulers. There is a rubberised, handy carrying handle on the top. If you prefer to have your hands free, you can also use the bag as a shoulder bag thanks to the wear-resistant, detachable shoulder strap. This means that all models are safely stored, all game material is neatly stowed away and your game is optimally protected on the way to the next expedition.
