Product Description

To ensure that nothing happens to your army on the way to the next mission, you get the matching MAXI PLUS bag including Feldherr foam inserts to protect your miniatures. Each miniature in your collection has its own custom-fit compartment. This keeps your models safely in place during transport. The soft foam not only protects the delicate parts of your figures. The colours of painted miniatures are just as safe from abrasion and scratches. The large compartment of the HSMETN095BO houses the hull of the anti-grav armour. Tailored precisely to the Repulsor Executioner of the Primaris Space Marines, the compartment ensures that the miniature is securely packed all round. The fragment storm grenade launchers and the two storm bolters remain intact during transport, as do the radar antennae. To ensure that the plasma torch or the destroyer laser are also safely stored, there is also a precisely tailored compartment for the turret. The included foam lid completes the set and ensures that your miniatures are protected from all sides by foam. The inserts naturally fit exactly into the sturdy MAXI PLUS bag. This is made of particularly hard-wearing material. Padded side panels and a reinforced base also ensure that your models are optimally protected from external influences, even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip at the front. There is a rubberised, handy carrying handle on the top. If you prefer to have your hands free, you can also use the bag as a shoulder bag thanks to the wear-resistant, detachable shoulder strap.
