Product Description

The Orcs live for the Waaagh, whether in improvised Dakkajets or in dilapidated Eavy Bommerz. The Orcs' faith moves mountains and steel. Where others tremble in fear, the mad pilots savour the thrill of battle. Their big guns and rocket dances not only bring death to their enemies. With this Feldherr MEDIUM bag you can transport your fleet comfortably and safely. Six half-size foam inserts ensure that all your Ork Luftwaaagh miniatures are neatly stowed away. Precisely dimensioned compartments for each individual model prevent the figures from sliding around or bumping into each other during transport. This ensures that the bombs, rockets and guns remain securely attached to the aircraft during transport. The colours of your painted planes are also protected from abrasion and scratches. Eavy Bommerz and Grot Bommerz each have their own inserts. Your large bombers fit exactly into the miniature recesses. You sort the corresponding bases into the hexagonal compartments. There is also space in the grot insert to safely store the crazy rocket gretchins either with a base in the four customised compartments or without a base in the star-shaped compartments. You can store flight stands, markers or other small items in the remaining compartments. We've also provided space for the Orks' more manoeuvrable aircraft, such as Dakkajets and Fighta Bommerz. You can store these in the foam inserts with ten or twelve compartments. You also get a separate insert for the ground targets - Schwerä Flak-Kanonän and the Ork bunkers. The landing zone markers and the numbered markers are also in good hands here. The foam tray with eleven compartments is available for your bases. Eight hexagonal compartments are particularly suitable for tidily storing your bases. Three small compartments in the centre can be used for tokens and other accessories. A half-size mat is included as a height leveller. Finally, the supplied foam lid ensures that your figures are securely packed all round and survive transport to the gaming table undamaged. The Feldherr MEDIUM bag is made of particularly hard-wearing material. Padded side sections and a reinforced base ensure that the miniatures are well protected even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip at the front. Here you can store booklets and other small items, for example. There is a rubberised, handy carrying handle on the top. If you prefer to have your hands free, you can also carry the bag comfortably as a shoulder bag thanks to the sturdy, detachable shoulder strap.
