Product Description

For safe storage and transport of your army So that you can store your "Adeptus Mechanicus" army safely and transport it comfortably to the gaming table, we have designed this Feldherr MEDIUM PLUS bag with the matching foam inserts for the members of the Church of the Machine God. The fine-pored foam offers reliable protection against damage - sensitive parts remain intact, surfaces do not get scratched. You can store the Onager Dunecrawler safely in the insert with the 3 compartments. The two smaller compartments of the insert are ideal for larger models such as Kastelan Robots. The inserts with 10 compartments each are ideal for infantry units such as Tech-Priest Engineer, Skitarii Vanguard, Sicarian Ruststalkers or Cybernetica Datasmith. Finally, the set comes with an insert divided into 25 compartments for standard warrior models. The MEDIUM PLUS bag is made of particularly hard-wearing material. Padded side panels and a reinforced base also ensure that the contents are optimally protected from external influences, even when being transported by car or train. In addition to the large main compartment, the bag has a small compartment with a zip at the front. Sheets, books and other accessories can be stored here. The two matching foam lids complete the set. One foam lid is used to level out the height of the stacks of inserts in the MEDIUM PLUS bag, while the other serves as a cover to ensure that nothing falls out during transport.
