ORG038 - Foam set + organiser for Infinity Defiance - basic game box

from **22,59 EUR**

Item no.: 379884
shipping weight: 1.00 kg
Manufacturer: Feldherr

Product Description

To stop the offensive of the alien invaders, the nations of mankind have put together a team of unique individuals. Courageous heroes, committed to the highest ideals and justice, attempt to repel the alien invaders in daring suicide missions and save humanity from extinction. We have designed this Feldherr Organiser for you to ensure that your miniatures reach their destination undamaged. Consisting of a foam insert and plastic token holders, it protects your miniatures and ensures that your game material is neatly stowed away. The set fits into the original board game box of the "Infinity Defiance" basic game by Corvus Belli. It offers space for all miniatures and the complete game content from the core game of the Kickstarter campaign. A foam insert protects the miniatures and helps to sort the cards and other game accessories. All cards also fit with protective sleeves. Eight token holders and a cross-shaped divider including plastic token holder serve as storage for tokens, tiles and markers. Campaign Book, Rulebook and Campaign Registrysheet are stored separately on the foam lid. You can store all your miniatures protected and tidy in the foam insert with a total of 23 compartments. 14 customised compartments for each individual model help you to sort the figures and ensure that the figures do not slide around and bump into each other during transport. This protects the colours of the painted models from scratches and paint abrasion. Once the figures are packed, we turn our attention to the game material. The largest compartment is available for the character cards and ally cards. Place the coloured plastic rings on top. Four card compartments with round cut-outs are available for the playing cards, as well as the three special bases and the four activated character tokens. Of course, the playing cards also fit in protective sleeves in the card compartments. Sort the dice into the two small compartments on the edge of the insert. Fit four token holders with a lid into each of the two remaining compartments. The token holders provide space for: State Tokens- Round Indicator, Alert Level Indicator and Minotaur Engine Tokens- Aggro Tokens/Reinforcement Tokens- Symbol Tokens- Crewmember Tokens- Damage Tokens- Structure and Corpse Tokens- General Markers- Ally and Enemy Tokens. At the bottom of the game box, put the cross-shaped divider together to create three large compartments. Place the 16 tiles and the control panel here. In the corner you will find a token holder with space for the connector panels, doors and plastic standees. Place the Defiance Panel on the divider. Place the foam insert on top and secure the contents of the insert with the foam cover supplied. This ensures that your figures are securely protected all round and cannot bump into the lid of the box during transport. Campaign Book, Rulebook and Campaign Registrysheet are stored separately on the foam lid. The set consists of: 1 foam inlay for miniatures and game material (BSMFMBM075BO)- 1 foam mat, 4 mm, as a cover- 8 token holders with plastic lids for the various tokens- 1 plug-in cross-shaped divider with token holder for cardboard tokens and standees- high-quality, fine-pored foam- chlorine-free and acid-free- Made in Germany- thermoplastic- 3D printed in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted.
