from **18,55 EUR**

Item no.: 379564  
shipping weight: 0.50 kg  
Manufacturer: Feldherr

### Product Description

If you think that the villains in the Disney universe have a hard life with their good counterparts, then you haven't yet donned the suit of Thanos or Hela. With "Marvel Villainous: Infinite Power", you finally have the opportunity to wreak havoc as a supervillain. And because we have a soft spot for villains, we support you in the fight against good with this Feldherr organiser, suitable for your board game box. The card and token holders keep things tidy and organised so that you can concentrate fully on your game. The foam insert takes care of the well-being of your villains. - The set fits exactly into the original board game box for the "Marvel Villainous: Infinite Power" basic game from Ravensburger. - A foam insert offers space for all 5 villain tokens of the basic game. - Three plastic card holders help you to sort the playing cards, villain handbooks and game aids. All cards also fit with sleeves. - A second plastic token holder serves as storage for the power chips. This replaces the safe from the original set. - The player boards and the game instructions are stored separately. - No assembly required. All parts are ready for immediate use. Even supervillains need a break. That's why Thanos, Hela, Ultron, Killmonger and the Taskmaster each have a customised compartment on the foam insert. The customised cut helps with sorting and also ensures that nothing slips around when travelling. The sensitive parts of the figures are therefore optimally protected from damage. Once you have painted your models, you can be sure that the colours are still intact even after transport. Once the miniatures have been taken care of, let's take care of the game material. The two card holders are each divided into 3 compartments. This means that each villain has their own compartment for sorting the individual packs of cards. Of course, these also fit here with protective sleeves. The 15 general fate cards and the speciality tiles are also stored in the card holders. In this set, we have replaced the safe with the power chips with a robust plastic token holder. This serves to stabilise the foam insert in the board game box. Just like the original cauldron, you place the token holder in the centre of the table during the game to store the power chips. The third tray fills the last empty space in the box. Place the five game aids and the rogue manuals here. Once everything is in place, cover the miniatures with the foam lid and place the player boards and the game instructions on top. All the miniatures are now safely stowed away and all the game material is neatly organised. You are now prepared for any heroic adversity. The set consists of: - 1 foam insert for rogue miniatures (EXMFCH040) - 1 foam mat, 4 mm, as a base and cover (EXBA004) - 2 card holders for rogue and destiny card sets - 1 card holder for play aids and manuals - 1 token holder for power chips The foam insert has the following dimensions: 160 mm x 160 mm x 40 mm high (+ 4 mm foam base and 4 mm top) - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany The card and token holders have the following dimensions: - Token holder for power chips: 161 mm x 100 mm x 34 mm height - Card holder Game aids: 161 mm x 100 mm x 26 mm height - Card holder: 113 (143) mm x 98 mm x 62 mm height - thermoplastic - no assembly required - ready to play - 3D printed in Germany As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted.
