ORG079 - Foam set + organiser for Nemesis - basic game box

from **29,66 EUR**

Item no.: 379886
shipping weight: 1.00 kg
Manufacturer: Feldherr

📄 Product Description

The nightmare begins with the awakening. This suspenseful sci-fi horror board game not only impresses with its dense atmosphere and well thought-out gameplay. The detailed alien miniatures in particular make this game something very special.And to keep the xenos as impressive as they are, here is the matching organiser set for your Nemesis board game box.- The set fits exactly into the original board game box of the "Nemesis" base game from Awaken Realms.- It consists of two foam inserts, three plastic token holders and a foam lid.- Provides space for all 26 miniatures and the complete game accessories of the base box. Optionally an additional compartment for the Adrestia promo miniature.- The foam insert made of soft, fine-pored foam reliably protects the miniatures from damage.- All playing cards also fit with protective sleeves.- The token holders are placed on the bottom of the box. The two opposing trays can be pushed together for a better hold. The character boards and the intruder board, scanner and intruder bag are placed in the gap next to the token holders.- The double-sided game board, room sheets, cardboard box holder and the two booklets are placed on the foam lid.- The lid of the board game box protrudes approx. 6 cm.- Transport and tilt-proof - vertical storage possibleWhile you fight for survival deep in space, we take care of the safety of your miniatures and the organisation of your box. You can store your miniatures in the foam insert and the game material can be clearly organised using the token holders. These ensure that your tokens remain clearly organised and that you can quickly start playing without wasting a lot of time sorting. Simply spread the token holders out on the table and show the aliens who's boss.The main components of the set at a glance:2 foam inserts for miniatures, playing cards, card holders and large-format tokens:- Each figure, whether adult, breeder or character, has its own compartment. It goes without saying that the Queen is allocated a large compartment that is precisely tailored to the miniature. This ensures that the finely detailed miniature remains securely in place when travelling.- The other compartments are also precisely tailored to the miniatures. Each figure is completely surrounded by foam. This means that even the roughest transport cannot harm the delicate parts. If you paint your miniatures, you can also be sure that the colours will be protected from scratches and abrasion.- If you own the "Adrestia" promo figure from the Lords of Hellas campaign, you will also find a suitable compartment for this detailed miniature.- In addition, the foam inserts have a total of four card compartments, two for small cards such as item cards and two compartments for larger cards such as objective cards. The compartments have finger-wide cut-outs to make it easier to remove the stacks and are of course also suitable for cards with sleeves.- There is an elongated compartment for the four card holders in one of the inserts.- The large-format tokens such as Escape Pods, First Player Tokens, Engine and Intruder Tokens are sorted into the remaining compartments.1 Token holder with three plastic compartments for dice, Room Tiles and Movement Exploration Tokens:- The hexagonal compartment is intended for the Room Tiles. These can be easily removed from the tray thanks to the finger-thick recesses.- You can distribute cubes and "Movement and Exploration" tokens in the other compartments.1 Token holder with two plastic compartments for Room Tiles and doors:- You can place the remaining Room Tiles in the hexagonal compartment with the recesses.- The large compartment is for the doors, including plastic ones. The large compartment is used to store the doors, including the plastic stand.1 Token holder with 15 plastic compartments for colour rings, tokens and markers:- This is where you store your small game material (e.g. colour rings, status and ammo/injury markers, Injury and Intruder tokens).- The insert can be connected to the opposite tray (three compartments) using a plug-in connection. This increases the stability of the box.The token holders are placed on the bottom of the box. Store the character boards and the intruder board in the open space next to the token holders. Place the scanner and intruder bag on the boards.A matching foam lid completes the all-round supply of your "Nemesis" box. The double-sided game board, room sheets, cardboard box holder and the two booklets are stored on the foam lid.This ensures that all miniatures are safely packed, the game material is neatly stowed away and the contents of your box are optimally protected, even on the bumpiest of journeys to the next game.The foam inserts have the following dimensions:- AFMEMB060BO: 285 mm x 285 mm x 60 mm total height (50 mm usable height + 10 mm foam base).- AFEM080BO: 285 mm x 285 mm x 80 mm total height (70 mm usable height + 10 mm foam base).- High-quality, fine-pored foam- Chlorine-free and acid-free- Made in GermanyAs with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted.- thermoplastic- no assembly required - ready to play- 3D printed in Germany
