TERA consists of 15 boxes that can be removed individually and distributed as desired on the play table.
Trays 1-9: One per player with the tokens in his/her colour
Tray 10: Game end markers and 100 victory point tokens
Tray 11: Worker cubes
Tray 12: Power chips
Tray 13: Favour tokens, sorted into 12 compartments as required in the game
Tray 14: All tokens and cards
Tray 15: The last and largest tray holds the action tokens, coins and landscape and race tokens
When all the trays have been placed in the box, there is an empty space at the top for the race boards, cult board, train board and cloth bag. Finally, the game board(s) and rules are placed on top. With one game board (basic game) the box closes flush, with two game boards (expansion) the lid rises by 10 mm. The box can easily be stored on edge.
This item is supplied as a kit that needs to be assembled. We recommend using wood glue for this (not included in the package).
